

Speed Repair – the perfect solution for minor damage.

Almost 30% of damage on vehicles is minor damage to the lower part of the body. This is where bodyshops are expected by a growing number of customers to provide an inexpensive refinish. For small paint repairs, Spies Hecker has therefore developed its Speed Repair process. With this method, the quantity of material used and working time are cut by almost half compared to a partial respray.

Refinish more efficiently with Speed Repair:

- More effective use of workshop capacity
- Time savings of up to 52% compared to a partial respray
- Greater customer loyalty thanks to lower costs
- Opportunity for extra business

Less material used.

Spies Hecker – simply closer.

Speed Repair.

The strategy for clever operators.

With the Speed Repair method, the repair of minor damage can be limited to the actual area of damage and is faster than a partial respray as a refinishing method. Spies Hecker offers one system solution for professional spot repairs.

 Speed Repair is ideal for these areas.

 Speed Repair is not suitable for these areas.

Standard Speed Repair.

The specially developed and perfectly balanced product system makes use of conventional technology and yields good paint results every time.

Specific advantages:

- More effective use of workshop capacity
- Greater customer loyalty thanks to lower costs
